Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant recites, "a cladding layer" and "a cladding layer" cladding layers should read as first and second cladding layers.

Applicant recites, "said layer thickness" lacks antecedent basis and it is unclear as to which layer has the thickness.

Applicant recites, "the cladding layer having current blocking structure" it is unclear which cladding layer has the carrier density and current blocking structure.

Applicant recites, "an effective refractive index parallel to the layer" it is unclear which layer has the effective refractive index.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kidoguchi et al (PN 5,502,739).

In figure 21A Kidoguchi et al illustrates AlGaInP cladding layers (202,205), a multiple quantum well (204) having 5 well layers (211) of GaInP shown in figure 21B and current block layer (207), see column 18 example 5.

FIG. 21A

FIG. 21B

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8 rejected under 35 U.S.C. 103(a) as being unpatentable over Kidoguchi et al (PN 5,502,739).

In figure 21A Kidoguchi et al illustrates AlGaInP cladding layers (202,205), a multiple quantum well (204) having 5 well layers (211) of GaInP shown in figure 21B and current block layer (207), see column 18 example 5.

Kidoguchi et al does not disclose the misorientation, however it would have been an obvious matter of design choice to provide the misorientation in the laser system, since the misorientation does not solve any stated problem because applicant has

clearly disclosed and implied on page 12 lines 25-28 that the device can solve the stated problems regardless of the orientation.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Armando Rodriguez whose telephone number is (703) 308-6218. The examiner can normally be reached on 10-hour day / M-F.
